Membership of the Company in Professional Organizations

On its official website, states membership in the following organizations: the **Association of Private Farming of the Czech Republic, SISPO - the Association for Integrated Fruit Growing Systems,** the **Central Bohemian Union of Fruit Growers and Nurseries Cooperative,** and the **Czech Beekeepers Association, Local Organization**

Membership in the **Association of Private Farming of the Czech Republic** is significant primarily because it is a voluntary professional and representative organization of private farmers in the Czech Republic that protects the economic, social, and professional interests of Czech private farmers and has long supported the model of family farms as the basis of modern European agriculture and a vibrant countryside.

Membership in **SISPO** is important from the perspective of the professional standard of primary fruit production. states on its website that fruit sold under the SISPO trademark is produced with significantly reduced use of pesticides and artificial fertilizers, with a preference for biological protection, safety control through analyses, and in compliance with strict standards. In addition, the Fruit Growers' Union states that SISPO is an independent special-interest association with its own controller of the rules, which underlines the importance of the integrated production system within Czech fruit growing.

Membership in the **Czech Beekeepers Association** demonstrates the company's relationship to the support of pollination, beekeeping, and the broader sustainability of the agricultural landscape.states on its website that one of the main tasks of the association is to support the professional level of its members, cooperate with public institutions, support research, promote the good health status of bee colonies, and especially the pollination function of bees as an irreplaceable natural activity.

Cooperative is important particularly from the perspective of the company's professional anchoring in the regional and national fruit-growing sector. According to the information published on Bromil's website, it is part of the nationwide Fruit Growers' Union of the Czech Republic, the purpose of which is to share practical experience in fruit cultivation and to protect the interests of members in the regional, national, and European context.

.....is a Czech food manufacturer and processor specializing in **fruit juices, 100% fruit juices, and other fruit-based beverages.** At the same time, it is also an active fruit-growing company with its own orchards. The company manages approximately **25,000 sour cherry, sweet c"erry, plum, pear, apple, and apricot trees,** with its main orchards located in the cadastral area of, and additional orchards inand. Fruit from its own orchards forms the basis for the subsequent production of fruit juices and beverages.

The company's production is focused on products **without added preservatives or additives.** It presses **100°/o fruit juices,** which are sold separately or used as thebase for other beverages produced by the company. The stability and safety of the products are ensured through **gentle pasteurization,** which also helps preserve the maximum amount of the fruit's natural properties.

declares that its production facility complies with all requirements imposed on food manufacturing under the applicable legislation of the **Czech Republic and the European Union.** Production is carried out in accordance with the rules of food law, food hygiene, production traceability, and proper product labeling. The main legal framework consists in particular of **Regulation (EC) No. 178/2002** laying down the general principles of food law, **Regulation (EC) No. 852/2004** on the hygiene of foodstuffs, **Regulation (EU) No. 1169/2011** on the provision of food information to consumers, and **Czech Act No. 110/1997 Coll., on Foodstuffs and Tobacco Products.**

A HACCP system has been implemented and is maintained at the production facility, and it is regularly verified. Quality management also includes **the company's own internal control mechanisms,** which go beyond the statutory requirements and support a high standard of safety, quality, and production traceability. Production is organized into **individual batches** that can be traced and verified retrospectively, including the archiving of samples from each production run. The control system is further complemented by **regular analyses carried out by accredited laboratories.**

In recent years, the company's production capacity has been significantly increased, including the possibility of filling into **aluminium cans.** Modern pressing and filling technologies enable the company to ensure stable supplies for customers both in the Czech Republic and across Europe.

An important part of the company's professional background is also its membership in professional organizations. On its website, states that it is a member of the **Association of Private Farming of the Czech Republic, SISPO - the Association for Integrated Fruit Growing Systems,** the **Central Bohemian Union of Fruit Growers and Nurseries,** and the **Czech Beekeepers Association.** These memberships confirm the company's active involvement in the professional environment of Czech agriculture and fruit growing, as well as its focus on professional standards, quality, and a sustainable approach to production.

representsa stablepartner that combines **its own fruit production, modern processing, controlled manufacturing, and a strong emphasis on the quality of final products.**
